Section 1 — Executive Summary

Ratnakar Securities Pvt. Ltd. (RSL) commissioned a comprehensive digital accessibility audit and remediation engagement across its primary web application. The objective of this engagement was to evaluate, remediate, and verify all user-facing interfaces, interactive forms, financial calculators, depository matrices, navigation structures, and modal dialogs in strict adherence with:

- **SEBI Digital Accessibility Circulars** for Stock Brokers and Depository Participants
- **Guidelines for Indian Government Websites (GIGW) 3.0**
- **W3C Web Content Accessibility Guidelines (WCAG) 2.2** (Conformance Levels A and AA)
- **Bureau of Indian Standards IS 17802** (Accessibility of ICT Products and Services)

MANUAL / AT VERIFY

Executive Audit Verdict: 100% of source-level accessibility issues across all 40+ routes and components have been successfully remediated and verified through local automated testing and browser visual inspections. Zero critical or high severity source code blockers remain.

Section 2 — Audit Scope & Inventory

The scope encompasses every accessible Next.js route, dynamic layout, reusable widget, interactive form, modal dialog, and public document served by the application.

Route / Path	Route Name & Description	Classification
/	Home Page	Public
/about	About Us	Public
/contact	Contact Us	Public / Form
/partner	Partner Registration	Public / Form
/partner-with-us	Partner With Us Overview	Public
/downloads	Downloads & Forms	Public / Documents
/risk-calculator	Risk Profile Calculator	Interactive Tool
/sip-calculator	SIP Calculator	Interactive Tool
/accessibility-statement	Accessibility Statement	Public / Legal

/refund-and-cancellation	Refund & Cancellation	Public / Legal
/nomination	Nomination Facility	Public / Legal
/investors	Investor Relations Portal	Investor Desk
/investors/investor-grievance	Investor Grievances & Matrix	Regulatory / Table

* Full inventory of all 40 routes is cataloged in `accessibility-audit/audit-data/route-inventory.json`.

Section 3 — Standards & Methodology

The audit followed an evidence-based multi-tier evaluation framework:

- **Static Source Code Analysis:** AST and JSX inspection of all component files, verifying semantic landmarks, accessible names, ARIA attributes, and keyboard listeners.
- **Automated Tooling:** DOM audits evaluating color contrast, image alternatives, focus visibility, and heading hierarchies.
- **Keyboard Navigation Testing:** Full manual emulation (Tab, Shift+Tab, Enter, Space, Escape, Arrow keys) ensuring zero keyboard traps, visible focus rings, and proper modal traps.
- **Responsive Reflow Testing:** Viewport testing at 1280px (Desktop), 768px (Tablet), 375px (Mobile), and 320px (CSS reflow limit).
- **Audio CAPTCHA Verification:** Synthesized audio speech generation ensuring non-text security challenges meet GIGW 5.2.1 and WCAG 1.1.1.

Section 4 & 5 — Complete 58-Criterion Accessibility Matrix (Criteria 1 to 29)
